

Couch & Bus Week | October 2015

Germany-based hardware and software development company, **INIT** describes itself as a solution that covers all operating areas within one closed loop.

Top of the range passenger information and integrated ticketing systems with real-time capabilities were available to try out.

The attractive and compact **MOBILEvario** wave and pay system was the obvious highlight on the stand. Customisable to the operator's requirements it sets a new standard of simplified smart ticketing.

Pawel Obszynski and Jens Mullack of INIT. KIM HUGHES
