Integrated. Innovative. International.

Integrated. Innovative. International

We offer a fully integrated planning-, dispatching-, and ticketing system

We conduct our research on an **international** scale, think outside the box, know the sector inside out and steer **new ideas** for the benefit of our customers

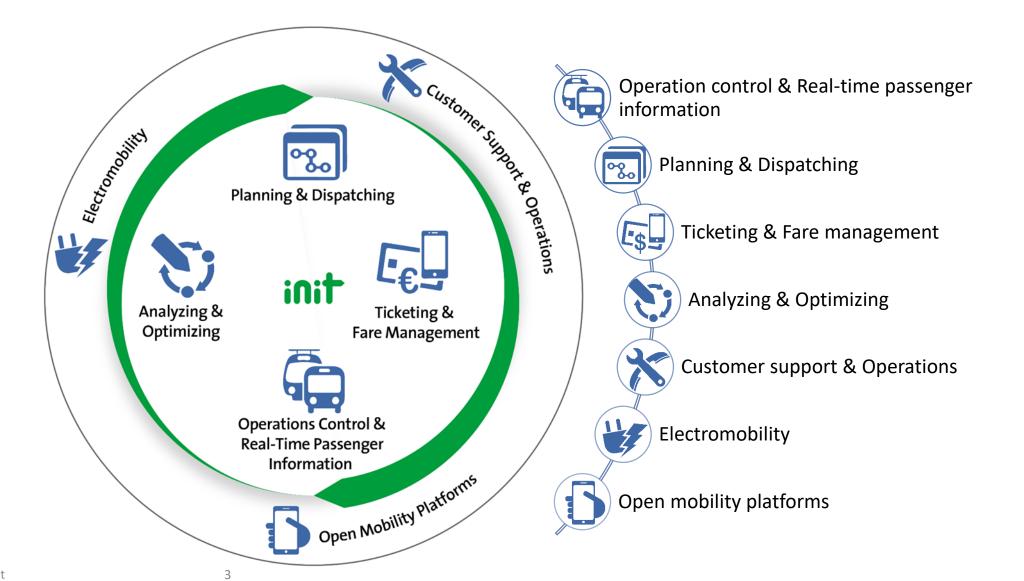

International

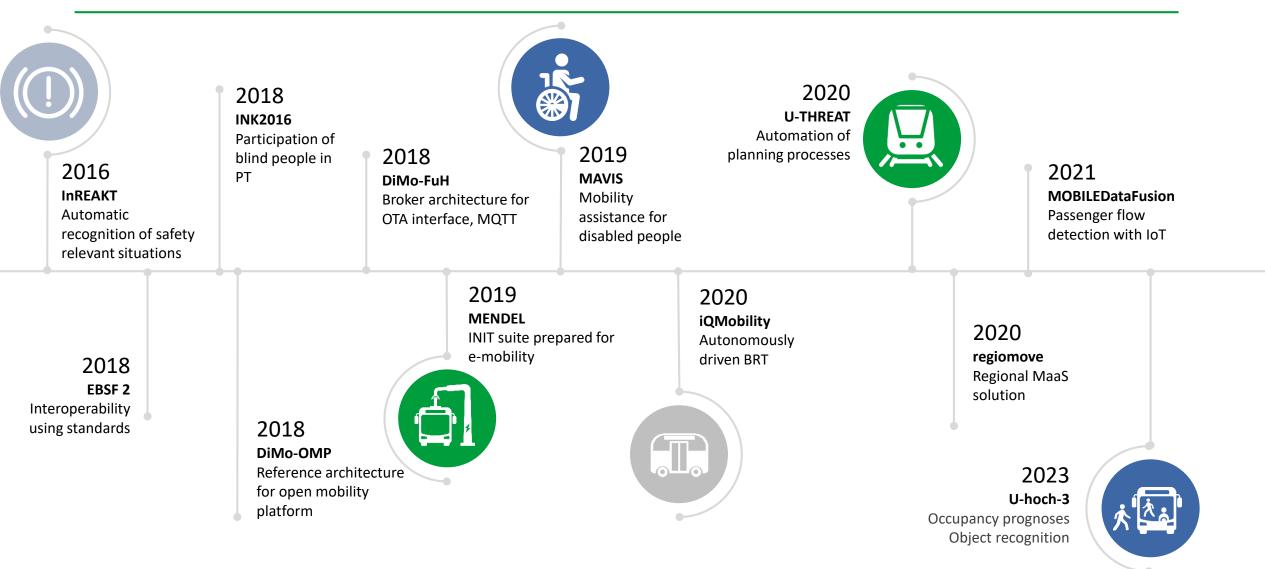

We always find **targeted solutions** for regional requirements - for 20 or 2,000 vehicles, for metropolises or rural regions

Integrated solutions for public transport

The Director of the United States Patent and Trademark Office

Has received an application for a patent for a new and useful invention. The title and description of the invention are enclosed. The requirements of law have been complied with, and it has been determined that a patent on the invention shall be granted under the law.

Therefore, this

United States Patent

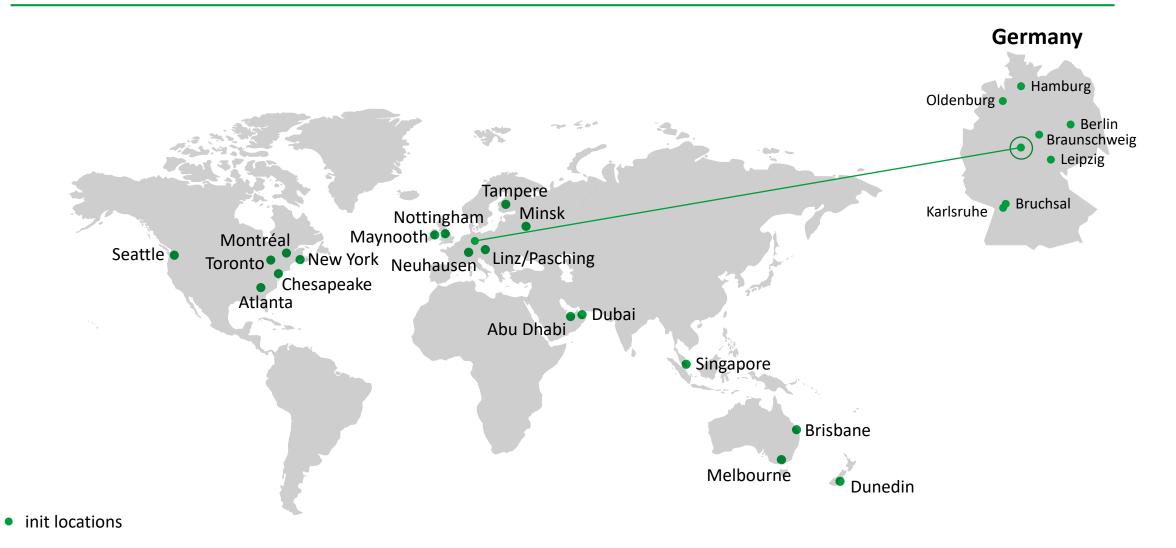

Grants to the person(s) having title to this patent the right to exclude others from making, using, offering for sale, or selling the invention throughout the United States of America or importing the invention into the United States of America, and if the invention is a process, of the right to exclude others from using, offering for sale or selling throughout the United States of America, or importing into the United States of America, products made by that process, for the term set forth in 35 U.S.C. 154(a)(2) or (c)(1), subject to the payment of maintenance fees as provided by 35 U.S.C. 41(b). See the Maintenance Fee Notice on the inside of the cover.

Director of the United States Patent and Trudemark Office

Future MOBILEguide -Passenger guidance system

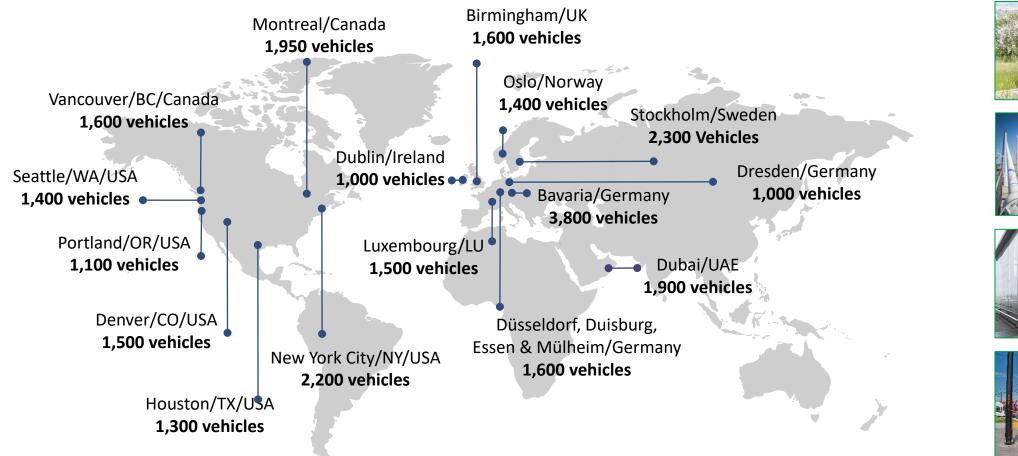

- When the vehicle enters, free spaces are displayed, e.g. signalling at the platform floor
- More convenience for travellers
- COVID-19: Physical distancing
- Shortening of the stop times at the stop
- Optimization of the usage of the existing infrastructure
- Cost-savings

init group worldwide

Projects with more than 1,000 vehicles

init at a glance

Technical business segments

Electronic ticketing

(high software share)

- Vending devices (stationary, mobile, smartphone)
- Back-office system (account and fare data management, accounting systems, ...)
- ITCS Intermodal transport control system (high software share) Real-time information and sub systems
- APC Automatic passenger counting (high software share)
- Timetable planning and dispatching of drivers and vehicles (100% software share)
- **Further modules** e.g. traffic signal priority, announcement technology, display technology, diagnostic systems ...

Economic business segments

Hardware & software products in project business

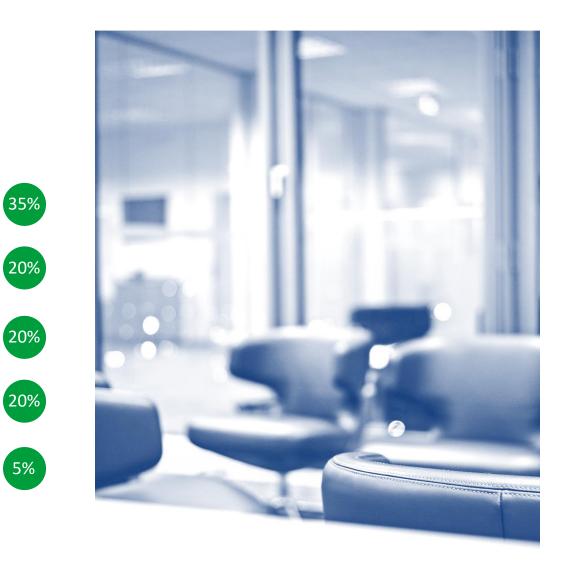

Software & hardware **maintenance**, incl. hotline

Delivery business (iris,...)

Follow-up orders from projects: devices, licenses and services

New business segment: **operations**

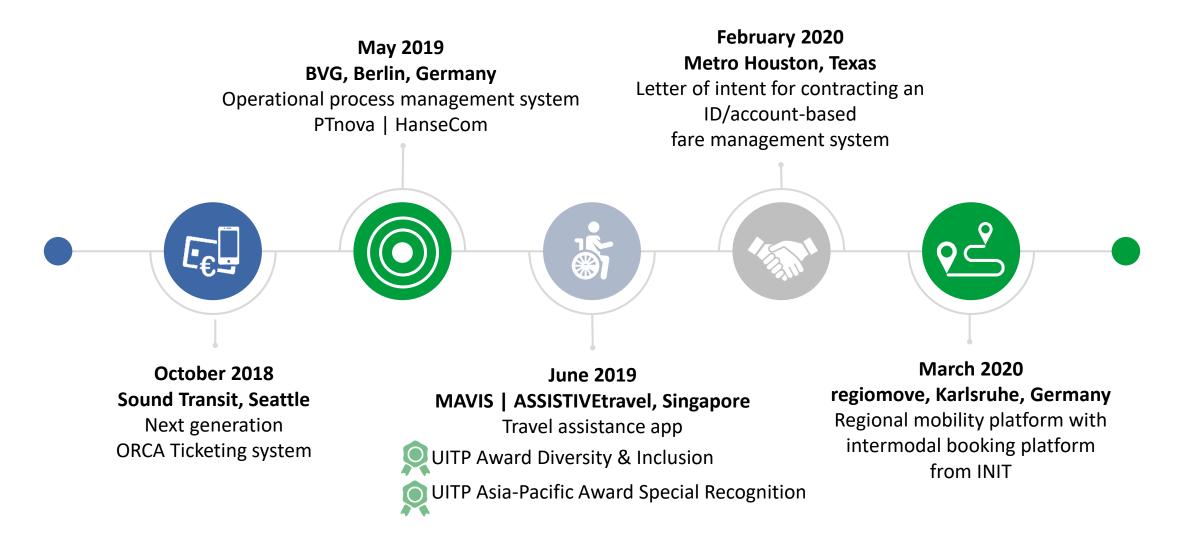

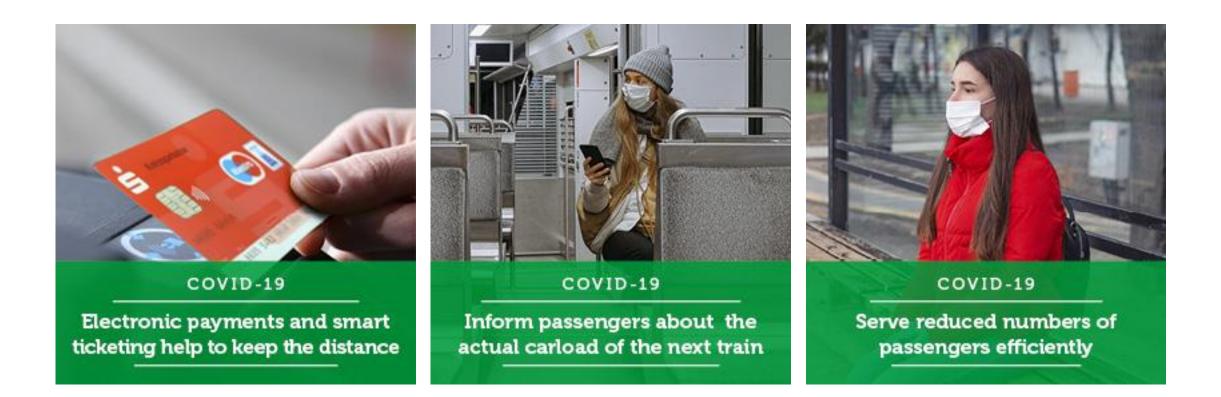

Growth | new members of the init group

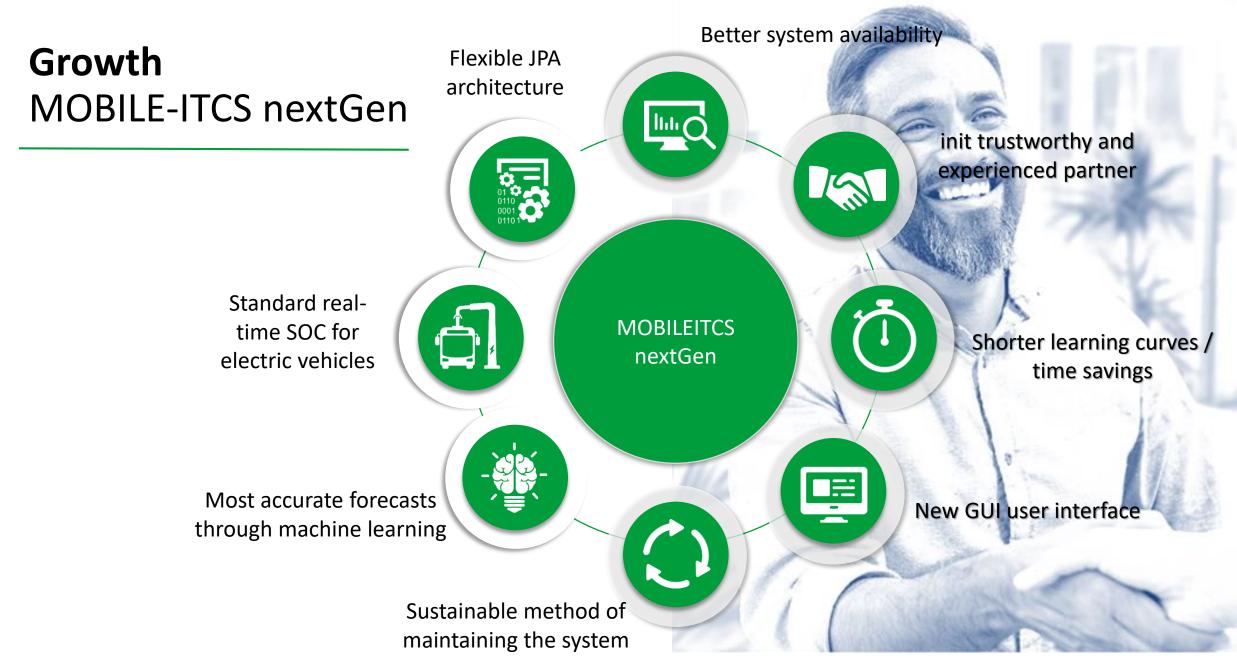

Zukunftssicher, effizient, robust: Video- systeme	HanseCom компания группы INIT		iris PTY LTD	
DResearch Fahrzeugelektronik GmbH Berlin, Germany	Hansecom BY Minsk, Belarus	INIT office Seattle, WA, USA	IRIS ASIA-PACIFIC PTY LTD, Melbourne, Australia	INIT Ltd. Maynooth, Ireland
With effect from 1 January 2020	Founded on 26 December 2019	Opening on 10 December 2019	Founded on 16 July 2019	Founded on 21 March 2018
Derovis GmbH 100% subsidiary of DResearch Fahrzeugelektronik GmbH	Shareholdings: 99% HanseCom 1% INIT GmbH	Current: Team of 15 employees Further expansion planned	Sales Office Asia-Pacific	Current: Team of 15 software developers Further expansion planned

Recent milestone projects

Coping with COVID-19 with init products

Growth ITCS goes rail

MOBILE-ITCSrail

- Display of the special features of railway systems (traction, coupling/uncoupling, track change, single track, etc.)
- Train configuration management
- Extended rail-specific passenger information
- Numerous railway-specific interfaces
- Integration of MOBILE-PLAN and MOBILE-PERDIS for the advance planning of trains and train crew

Growth ASSISTIVEtravel

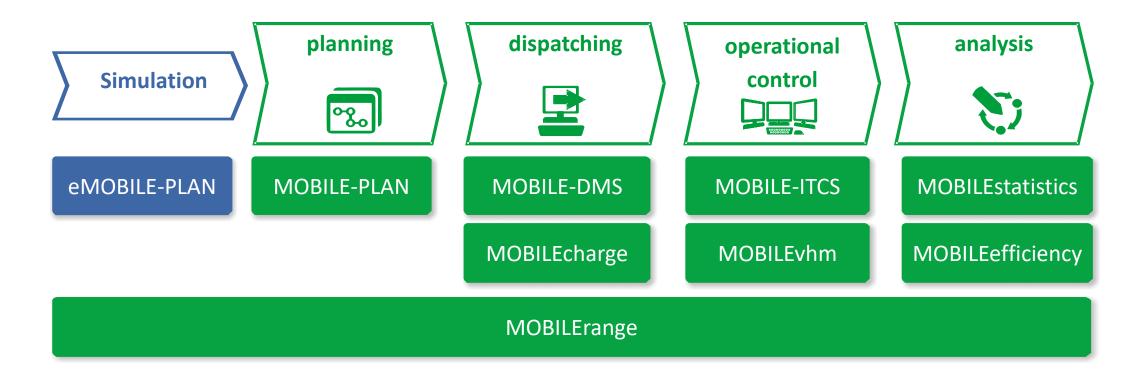

- Easy use for
 - Mobility-impaired
 - Visually-impaired
 - Hearing-impaired
- Individual planning
- Individual travel support, e.g. interior and exterior vehicle announcements and information to the bus driver
- Pilot projects in Singapore
- 2 UITP Awards:
 - » Asia Pacific Special Recognition Award
 - » UITP Innovation Award in the category "Diversity & Inclusion"

Growth Electromobility

init customers receive a complete solution from one source

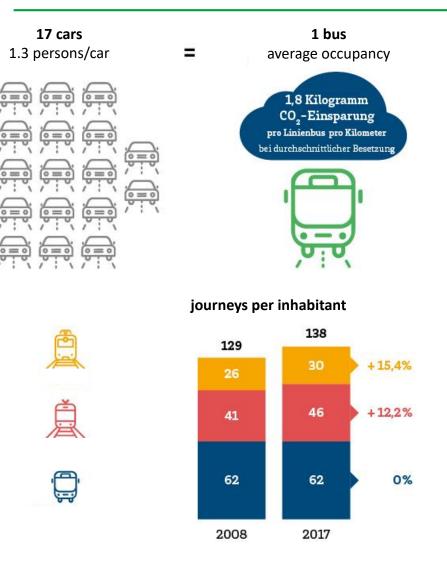

Growth Customer support & operations

init: from technology provider to service partner

- Strong growth
- Orders secured for more than 10 years
- Strong customer loyalty

More climate-friendly local transport

A clear environmental benefit for public transport

Public transport saves a total of 10.5 million tonnes of greenhouse gas emissions. Every kilometre travelled by public transport saves 95 grams of greenhouse gases and 19 grams of nitrogen oxides on average compared to driving. Another advantage of public transport is that it relieves the roads and reduces the risk of congestion. If public transport customers were to travel by car, 86.5 billion additional car kilometres would be needed on German roads

138 journeys per inhabitant - never before has so much public transport been used as today

In 2017, each inhabitant boarded a bus or train an average of 138 times. In 2008, there were 129 entries (+ 7 percent)

Source: VDV-Statistik, Statistisches Bundesamt | Stand: January 2020

Future Mobility in transition

- Regiomove: Sustainability of ONE-STOP networked mobility for the ENTIRE REGION (Technology Region Karlsruhe)
- Mobility as a Service (MaaS): integration of all modes of transport and one ticket for all modes of transport

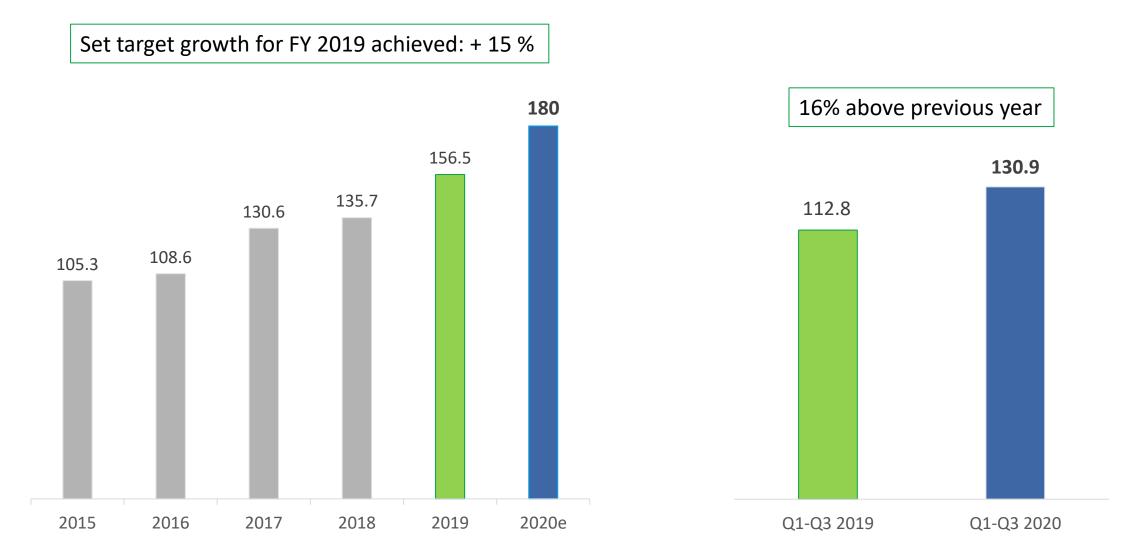

Growth and Future Prospects

- New products with high growth rates in the market (e-ticketing, operations, etc.)
- Numerous new products in the market launch (rail, barrier-free travel assistance, etc.)
- New markets are being developed (electromobility, autonomous driving, etc.)
- High investments in R&D and personnel are increasingly paying off
