

“The INIT concept is simple: learn within the team and bring in your initiative. Right from the beginning, I was allowed to implement my own ideas”

1st Eclipse Hackathon in Karlsruhe!

November 15, 2017

init

The Future of Mobility

What is a Hackathon?

This is your chance to **meet with contributors and other interested developers to improve Eclipse projects**. We expect you to know how to develop in Java. No previous Eclipse development knowledge is required.

Don't miss out and see how other people work on Eclipse. Find areas where you may want to contribute to Eclipse to improve your favorite framework or IDE feature or simply put your questions to the attending committers.

What is typically done at an Eclipse-Hackathon:

- ✔ work on and contribute to the Eclipse source code
- ✔ new features are tested in the Eclipse IDE
- ✔ new Eclipse bug reports are opened or existing reports are being validated

If you are an Eclipse user, contributor or committer, we hope this event will be a lot of fun for you. Attendees can hack away with the help of experienced Eclipse developers and can help to improve the Eclipse platform and its projects.

So, bring your laptop and be ready to do some coding!

Location: init - K ppelestra e 4-10, 76131 Karlsruhe

Date and Time: November 15, 2017 – Start: 18.00 pm

Please register prior to the event until November 12, 2017 at latest. Either send an email to hackathon@initse.com or put your name down on the wiki page https://wiki.eclipse.org/Hackathon_Karlsruhe_2017_November. There you will also find more information about this event and how to prepare for it!
