E-FARE EXCHANGE
PROGRAM ALL TIMES ARE IN EST

init — The Future of Mobility

TUESDAY SEPTEMBER 21 + FRIDAY SEPTEMBER 24 ALL SESSIONS OFFERED BOTH DAYS

10:00 - 11:00 AM

What's new and improved in the core back-office fare system, MOBILEvario

Sascha Heyer, Team Manager, Back-Office Ticketing, INIT Group

Did you know there is a new statistics app associated with MOBILEvario, your back-office fare management system? It's connected to a data warehouse and can combine multiple data sources to provide fare reporting on most any data set you need. In addition, the MTT certification is all part of what's new with MOBILEvario – fare processing open payments in 100-300 ms – even faster than the credit card companies 300-500ms requirement! Learn about this and so much more in this session presented by the developer himself.

11:00 AM - 12:00 PM

How to master your mobile fare validations and inspections

Martin Nylund, Lead System Architect, INIT Group

In the era of contactless payments, speed, accuracy, and flexibility are essential when handling fares. Making sure you capture revenues for your service is necessary and how you do that should not be difficult or time-consuming. INIT has developed, PROXgo, an all-in-one mobile solution for performing quick inspections and validations. The solution incorporates a commercial off-the-shelf (COTS) Android smartphone with INIT fare apps and a near-field communication (NFC) card reader for accurate mobile fare processing. Get a first-hand look at this cost-effective tool for mobile fare validations and inspections.

1:00 - 2:00 PM

How to proactively manage fare system maintenance and reporting issues

Paul Cohoon, Systems Engineer, INIT Inc.

Modern-day electronic fare collection systems are complicated financial systems that must adapt to the ever-changing landscape of system security and scalability. As anyone in the business of maintaining ITS systems and processes can tell you, the best people for the job are the people who built the technology. Having experts manage your system allows you to not only benefit from continual and timely improvements, but also assurance that any system deficiencies will be handled by those who are most vested - allowing the agency to focus on what they do best- serving their riders. Learn how Tampa and other agencies are using managed services to solve fare system issues.

2:00 - 3:00 PM

How MTT specifications for open payment technologies are revolutionizing the public transit fare payments environment.

Andy Singh, Systems Engineer Manager, INIT Inc.

Despite the ravaging effects of the pandemic, positive changes to fare collection in public transit have been achieved. Contactless and open payments are on the rise. Visa's Mobility and Transport Transaction (MTT) framework is an integral part of the positive change coming to fare payments. MTT certification ensures high transaction speeds so riders can tap and ride public transit systems more quickly and efficiently. INIT is working together with Visa and The Regional Working Group in Tampa, Florida to integrate the MTT certification to offer their riders the speed, safety, and ease of open payments they desire. Learn how we are partnering to make public transit faster, safer, and more efficient in San Diego, Nashville, Tampa and other cities around the US.
